

# Nokia Innovation Platform

Nokia development and trial service for start-ups, industries and other IoT and 5G contributors

Älyväyläpäivä  
January 24th 2017

Markku Rauhamaa  
Nokia Innovation Steering

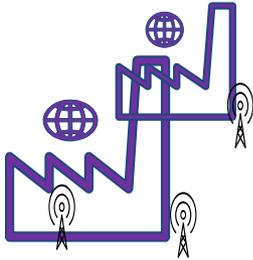

**NOKIA**

# Nokia Innovation Platform Service is available now

Simple way of new generation of solution development for IoT and 5G

**Local / Micro networks**

**Multi-Access:**  
Cellular networks,  
Wi-Fi, Satellite,  
PMR...

**Centralized or distributed applications**

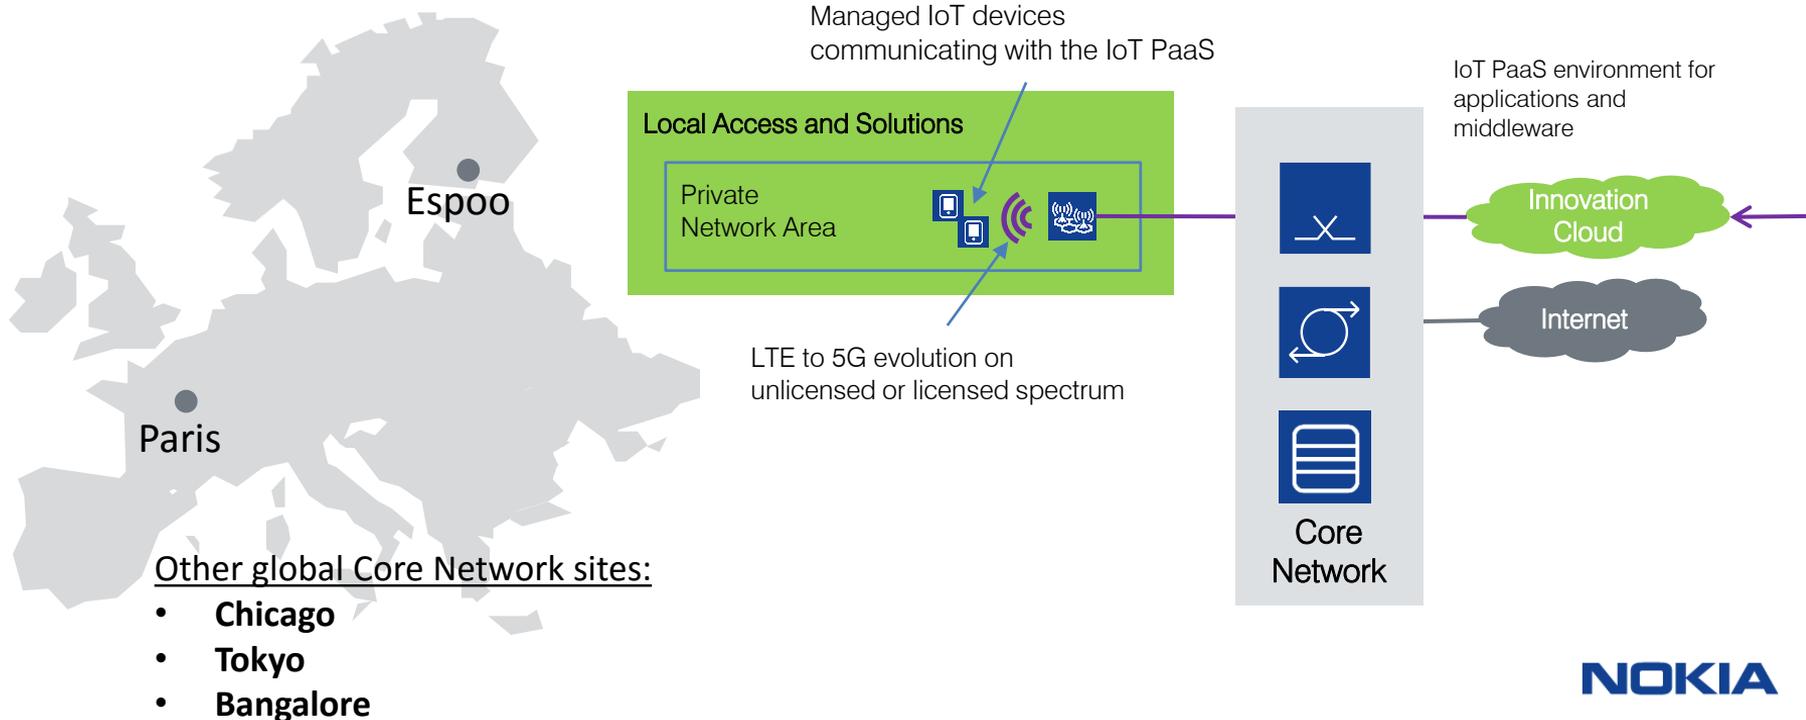

- ✓ Optimized, Secure, Private
- ✓ SIM or PKI authentication
- ✓ Lowest latency with local GW

- ✓ Best available network(s)
- ✓ Cellular operator switching
- ✓ Cellular/non-cellular switching

- ✓ Nokia Cloud Data Center
- ✓ Management
- ✓ Slicing

# Your specific IoT and 5G solutions running on Nokia secure connectivity service

## Dedicated wireless connectivity with enhanced reliability

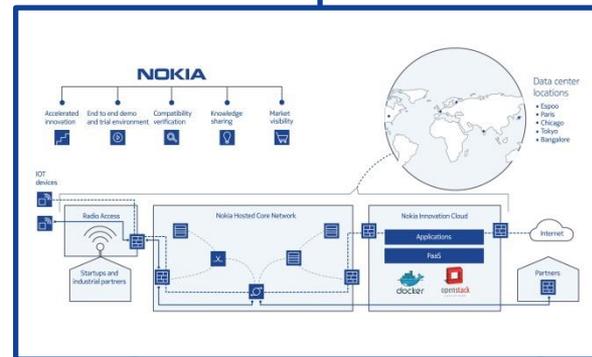

# Example Self driving bus

Nokia Innovation Platform used for real life Robot bus experimentation

Project with Greater Helsinki area ecosystem

Other existing projects:

- Global product connectivity
- Industry campuses,
- Harbour
- Automated & Remote control tools
- Drones

Cloud and Internet services

Nokia Innovation Platform

### Operational services

Fleet Management  
Bus Control  
Emergency Steering  
Security/Safety  
Payment Tracking  
Statistical Data  
... new Innovations

### Travel and Fun services

Bus-on-demand  
Goods Delivery  
Multimedia AR/VR  
Advertising  
Open Internet  
Tourism Info  
... new Innovations
